

WATER DEPARTMENT REPORT

January 26, 2015

Prepared by Dan Protivansky

ACCOMPLISHMENTS:

- Cut and capped the 6 inch finished water main at the Chittenden plant. We have one more to do in the spring when the ground thaws.
- Worked with the DEC Water Supply Division on stage 2 DBP monitoring schedule. Picked out 2 new sampling sites and the division approved.
- Bob Coons installed new shelves and counters at Field St Well. We now have our office set up and everything looks good.
- Assisted the HW Dept with snowplowing and sidewalks
- Took 2 required total coliform samples in the distribution system, all samples were good
- Met with Don Haddox, DCE FED, at the Well on the 15th
- Sanded the sidewalks on the 20th and 21st
- Worked with Stan doing invoices
- Organized the office at the Well, bought stackable totes to store all tools and equipment
- Worked with Stan developing a daily, weekly, and monthly operations form
- Cleaned up at the Chittenden Water plant, we brought back all the tools and equipment we needed. Working with VRWA to post some equipment on their website to try and sell
- Completed a spring/summer project work list and submitted to Stan
- Loading the woodstove twice a day on the weekends

IN PROGRESS:

- Building chart holders for the Well office
- Scheduled with John Carol to install an outlet at the WWTF so we can plug the F350 block heater in at night
- Fix broken vent pipe at the Well. It was hit by the plow
- Leak detection training with VRWA. We will schedule this when our new equipment arrives. Should be here soon
